SUMMARY

Results-driven software developer specializing in Full-stack web development using React, Node.js and MongoDB. Proven expertise in creating scalable, high-performance applications with a focus on user experience, backend efficiency, and API integration. Adept at working in agile environments with strong communication, problem-solving, and debugging skills.

ASPIRATION

To secure a software engineering position in a growth-oriented company, where I can contribute to building scalable systems, deepen my full-stack development expertise, and innovate solutions to real-world challenges using modern technologies.

PROJECTS

Youtube Clone - Developed a YouTube clone application using the MERN stack (MongoDB, Express.js, React, Node.js) with responsive UI built using HTML and CSS. Implemented key features like video upload, playback, user authentication, and dynamic content rendering. Focused on efficient REST API design and optimized database operations to ensure smooth user experiences.

Shoppo Globe E-Commerce - Developed a secure backend for the Shoppo Globe e-commerce platform using Node.js, Express.js, and MongoDB. Implemented RESTful APIs with JWT authentication, CRUD operations, and role-based access for cart management. Integrated robust error handling, input validation, and tested all endpoints using Thunder Client for reliability.

Kanban Board - Built an interactive Kanban board using ReactJS with drag-and-drop functionality for seamless task management. Implemented dynamic task filtering with a real-time search feature to enhance workflow efficiency and usability.
